DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 8, 2003 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Specification

3. The amendment filed September 8, 2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: paragraph on page 1, beginning at line 14, insertion of the term "not" contradicts the original disclosure.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 24-35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 24 and 33 recite the limitation "predetermined microdots." The specification fails to teach any particular or predetermined microdots. It is unknown what "microdots" are being claimed by applicant.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 24-35 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 24 and 33 recite the limitation "predetermined microdots." The specification fails to disclose "predetermined microdots." The plain meaning of "microdot" is

A copy or photograph that has been reduced to an extremely small size for ease of transport and purposes of security.

The American Heritage® Dictionary of the English Language, Third Edition copyright © 1992 by Houghton Mifflin Company.

Another possibility is that "microdots" are considered micro-sized dots. In which case, any material, at it's microscopic level, can be considered to be made up of microdots. The metes and bounds of the claim cannot be determined.

Claim Rejections - 35 USC § 102

8. Claims 24-28 and 30-35 (as best understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Inglis (956,101).

Inglis discloses an identifier label applicator comprising: a container 1; a plurality of predetermined identifier labels (and base fluid) 2; a discharge aperture 12; a fluid intake 8; a dynamic fluid conduit 9, 21; a container valve 20.

9. Claims 24-29 and 31-35 (as best understood) are rejected under 35 U.S.C. 102(b) as being anticipated by McRitchie (3,236,459).

McRitchie discloses an identifier label applicator comprising: a container 18; a plurality of predetermined identifier labels (and base fluid) 190; a discharge aperture 130; a fluid intake (connection to tube 40); a dynamic fluid conduit 40, 182; a container valve 42.
